K. JAHN, A note on compact Lamperti operators
IEOT (1989), Volume 12, Number 5, 746-750

After this paper was finished B. de Pagter and A.R. Schep showed (J. Func. Ana. 78 (1988) 31-55) that every compact Lamperti operator between Banach lattices E and F is identically zero if E' has no atoms. So the main result of this note is due to them.

K. Jahn
