Bangalore 560059, India

Probab. Th. Rel. Fields 78, 149–163 (1988)

After the publication of the above article, it has been brought to the author's attention that Theorem 2.7, in the case when $x \notin M$, was originally obtained by Friedman (1974); (see also Chap. 11 of Friedman (1976)). However, the results of Sect. 3 of the article do not seem to be previously known.
