Erratum

In the paper "Serologic Differences Among Nondefective Reticuloendo-theliosis Viruses" by P.-Y. Chen *et al.* [Arch Virol 93: 233–245 (1987)] Table 2 on p. 238 was incorrect and should be read as demonstrated on the following page.

Table 2. *Cross neutralization tests among 26 reticuloendotheliosis virus isolates*

Sub type	Isolate	Virus dose[a]	Homol serum titer	T-C	T-F	T-S	T-T	T-A	RPL	170A	DIA	SN	MN67	MN81	RU-1	221A	225A	339	348G	363	375A	375B	377A	383A	401	488	489	CS	260

a Calculated number of tissue culture infectious units per well

b The reciprocal of the titer of a serum against its homologous virus was divided by the reciprocal of the titer against the test virus and expressed as log$_2$. Means of relative titers for each of the 9 blocks are given in Table 3
