Detailed Balance in Open Quantum Markoffian Systems

H.J. Carmichael and D.F. Walls

Z. Physik B **23**, 299 – 306 (1976)

Equation (3.25) should read

$$\begin{aligned} P_{ss}^{(\Omega)}(\alpha, \alpha^*) \exp[\vec{A}^{(\Omega)}(\alpha, \alpha^*)] \mathcal{L}^{(\Omega)}(\alpha, \alpha^*)^n \\ = \mathcal{L}^{(\Omega)}(\alpha, \alpha^*)^n \tilde{P}_{ss}^{(\Omega)}(\alpha, \alpha^*) \exp[\vec{A}^{(\Omega)}(\alpha, \alpha^*)]. \end{aligned}$$

Equation (3.27) should read

$$\begin{aligned} P_{ss}^{(\Omega)}(\alpha, \alpha^*) \exp[\vec{A}^{(\Omega)}(\alpha, \alpha^*) \tau] \mathcal{L}^{(\Omega)}(\alpha, \alpha^*) \\ = \mathcal{L}^{(\Omega)}(\alpha, \alpha^*) \tilde{P}_{ss}^{(\Omega)}(\alpha, \alpha^*) \exp[\vec{A}^{(\Omega)}(\alpha, \alpha^*)]. \end{aligned}$$
