 Neither of these papers directly addresses the question of calculating the fluorescent spectrum as defined in [21]. Nevertheless, their results, although in error as presented, in fact agree with the fluorescent spectrum from Refs. 20 and 21. As such, they have been accepted as support for the current understanding of fluorescence in absorptive bistability

Erratum

Phase Diagram of a Simple Model of $\text{Eu}_p\text{Sr}_{1-p}\text{S}$

Shigetoshi Katsura and Izuru Nagahara

Z. Phys. B - Condensed Matter **41**, 349–351 (1981)

In page 351 line 9 in the left column, and in the caption of Fig. 3, $J = -2J' > 0$ (or $J' = -J/2 < 0$) should read $J' = -J/3$.
