### *Scope of the conference*

The aim of this conference is to bring together immunologists involved in understanding the mechanisms of induction and disruption of tolerance in the immune system and to discuss the generation of T cell memory. The emphasis will be on selection of immature lymphocytes, antigen presentation function, tolerance and autoimmunity, life expectancy of naive, effector and memory lymphocytes. The meeting will aim at evaluating the progress to date and discussing new ways forward in the field. A poster session will also be organised.

The number of participants will be limited to 100. There will be a Registration Fee covering full board and lodging. Some grants will be available for younger scientists, in particular those from less favoured regions in Europe.

*Deadline for applications: 3–4 months before the conference.*
