CORRECTION

There was a mistake in the labeling of Figure 3 in the article "Accuracy of End-Tidal Carbon Dioxide Tension Analyzers," which appeared in the April issue (Raemer DB, Calalang I. *J Clin Monit* 1991;7:195–208). In Figure 3A, the top curve, which was labeled C-IR, should have been labeled D-IR, and the bottom curve, labeled D-IR, should have been C-IR. In Figure 3B, the top curve, labeled D-IR, should have been labeled C-IR, and the bottom curve should have been labeled D-IR. We apologize for this error.
