

## ERRATUM

A.D. McGuire, L.A. Joyce, D.W. Kicklighter, J.M. Melillo, G. Esser, and C.J. Vorosmarty, 'Productivity Response of Climax Temperate Forests to Elevated Temperature and Carbon Dioxide: A North American Comparison Between Two Global Models', *Climatic Change* 24, pp. 287-310 (1993).

In this article Figure 6 (on page 298) was inadvertently printed without colour bar. The correct version is printed in this issue, page 199. The publishers regret any misunderstanding caused.

Fig. 6. A map of percent difference between the annual NPP predictions of TEM and OBM for climax temperate forests in North America. Percent difference is calculated as  $(NPP[TEM] - NPP[OBM]) \times 100/NPP[TEM]$ . ➤
