

ANNOUNCEMENT OF MEETING

SYMPOSIUM: 'THE PROTEROZOIC BIOSPHERE: A MULTIDISCIPLINARY STUDY'

- Dates:* 20–22 August 1988.
Location: Center for the Study of Evolution and the Origin of Life (CSEOL),
University of California, Los Angeles U.S.A.
Organized by: The Precambrian Paleobiology Research Group – Proterozoic
(PPRG-P)
Schedule: Saturday, August 20th: Registration; Mixer
Sunday, August 21st: Symposium; Posters
Monday, August 22nd: Symposium; Posters, Banquet
Registration: US\$10 (waived for those who preregister prior to 1 June 1988)

The PPRG-P, a 50-member international multidisciplinary consortium investigating interrelated biospheric-lithospheric-environmental evolution during Proterozoic time, will convene a two and one-half day symposium at UCLA in August 1988. Topics addressed will include the following:

- Geology and Paleobiology of the Archean Earth
- Geologic and Environmental Evolution of the Proterozoic Earth
- Proterozoic Biochemistry
- Modern Mat-Building Microbial Communities: a Key to Interpretation of the Proterozoic Biosphere
- Proterozoic Microfossils, Megafossils, Biostratigraphy and Biogeography
- Biochemical Phylogeny and the Proterozoic Fossil Record
- Biotic Diversity, Rates of Evolution, and the Development of Proterozoic Ecosystems

For additional information, list of participants, and preregistration materials, contact:
