

ANNOUNCEMENT

ORDER

A Journal on the Theory of Ordered Sets and Its Applications

ISSN 0167-8094

Editor: IVAN RIVAL, University of Calgary, Canada

Editorial Board: A. Björner, Sweden; R. P. Dilworth, U.S.A.; P. C. Fishburn, U.S.A.; F. Galvin, U.S.A.; R. L. Graham, U.S.A.; G. Grätzer, Canada; P. Hell, Canada; B. Jónsson, U.S.A.; D. Kelly, Canada; D. A. Klarner, U.S.A.; J. K. Lenstra, The Netherlands; M. Pouzet, France; J. G. Rosenstein, U.S.A.; B. Sands, Canada; D. S. Scott, U.S.A.; W. T. Trotter, U.S.A.; R. Wille, Germany

ORDER is a new specialist journal devoted to the theory of ordered sets and its applications. It aims to be an authoritative forum on new and important developments in the subject. ORDER is an interdisciplinary journal devoted to the application of the theory of ordered sets throughout mathematics, operations research, computer science, and the physical and social sciences. In mathematics, ordered sets occur in algebra, combinatorics, geometry, model theory, set theory, and topology. The theory of ordered sets bears on topics throughout mathematics and this association enriches and invigorates the theory of ordered sets itself. ORDER intends to document and to promote this vitality.

The first issue of ORDER will be published in Spring 1984 and prospective contributors are encouraged to write to the Editorial Office for information concerning the preparation and submission of papers.

Editorial Office:

Department of Mathematics and Statistics,
The University of Calgary,
2500 University Drive N.W.,
Calgary, Alberta T2N 1 N4, Canada.

A free copy of the first issue can be obtained by writing to the publishers:
