B. I. Popov, L. N. Shkuratova and N. G. Skorokhova: Influence of sodium salts on the catalytic properties of iron-molybdenum oxide catalysts in the oxidation of methanol to formaldehyde,

Vol. 3, No. 4, 463 (1975)

The correct name of the third author: N. G. Skomorokhova

*

F. Campadelli and J. C. J. Bart: ESR line-shape analysis of $\text{MoO}_3 \cdot \text{Al}_2\text{O}_3$ catalysts

Vol. 3, No. 4, 435 (1975)

The last sentence of the paper (p. 441) should read: "Considering the MoO_3 deposition as purely random, and assuming Mo(V) to be placed in a MoO_3

lattice at least two layers thick, the smallest mean distance in MoO_3 -30-O may be justified by the fact that the ions are spread over a smaller surface in the upper layers and, consequently, they have a greater occupational fraction /5/."

Figure 1a should be interchanged with 1c, and Fig. 1d with 1e.
