Received February 8, 1991

There is a systematic factor of 2 error in the discussion and example on pp. 105/106. The factor of 2 on the right-hand side of Eqs. (2.1), (2.2), and (2.3) on p. 105 should be dropped. On p. 106, the factor of 2 in Eq. (2.5) and in the first centered equation after that should also be dropped. In Proposition 4, the first equation in braces should have the 3 replaced by 2, and the first plus sign replaced by a minus sign. The second equation in the brace should have the 2 replaced by 1. The limits at the end of Proposition 4 should be adjusted accordingly. In the proof of the proposition, the two places that 2λ appear should be replaced by λ .

The authors should like to thank Yoram Last for pointing out these errors.
