Announcements

VIIIth International Symposium on Chromatography and Electrophoresis

Brussels, September 13 to 15, 1972

The Belgian Society of Pharmaceutical Sciences has the honour to announce that they will organize their VIIIth Symposium on the theoretical aspects and the various practical applications of Chromatography and Electrophoresis, from September 13 to 15, 1972.

This Symposium will have two main subjects:

1. Liquid Instrumental Chromatography
2. Electrofocusing

All the specialists of these techniques are cordially welcome.

The lectures outside the two themes will be accepted in restricted number.

All persons interested in Chromatography are cordially invited to attend this Symposium. Registration will be accepted until August 1st 1972. Those of the participants who wish to present a paper should register before May 1st 1972.

The official languages of the Symposium are French, Dutch, German and English.

During the Symposium, a scientific exhibit will be organized.

Any other informations concerning this Symposium can be obtained from the Secretariat of the Belgian Society of Pharmaceutical Sciences, 11, rue Archimède, 1040 Brussels.

The Organizing Committee

Institute of Petroleum Gas Chromatography Discussion Group

Life Science Applications of Gas Chromatography

A significant increase in the uses of Gas Chromatography in the Life Science field over the last few years has led to the need for a co-ordinating group for the technique in this area.

The Gas Chromatography Discussion Group of the Institute of Petroleum is aware of this need and is proposing to form a Sub-group dealing with the uses of Gas Chromatography in the Biomedical and associated fields.

The objectives of the Sub-group will be to advance and pursue the uses of Gas Chromatography in the Life Sciences and Biomedical fields by providing its members with a forum for discussion on the uses of the technique related to these fields.

Topics on the analysis of Drugs, Drug metabolism, Steroids, Lipids, Toxicology Anaesthesia and allied subjects will be embraced by the Sub-group, and it is felt that a much needed link will be established between workers in these fields.

Subscription to the Gas Chromatography Discussion Group will be £4.00 per year from January 1st, 1972. This figure includes membership to all the Sub-groups and free distribution of the Abstracts. Hopefully, the Biomedical Sub-group will come into being early in 1972.

Addendum

Chromatographia 4, 300–308 (1971)

H. Boer / P. van Arkel

An Automatic PNA Analyser for (Heavy) Naphtha

Glossary of Abbreviations

PNA	Paraffins/Naphthenes/Aromatics
PONA	Paraffins/Olefins/Naphthenes/Aromatics
nP	Normal paraffins
iP	Isoparaffins
N ⁵	5-Ring naphthenes
N ⁶	6-Ring naphthenes
ucp	Upper cutting point

BP	British Petroleum Cy.
KSLA	Koninklijke/Shell-Laboratorium Amsterdam
FID	Flame Ionization Detector
CYCLO-N	Hexakis (cyanoethoxy) cyclohexane
TCENM	Tris-(cyanoethyl)nitromethane
UCCW 98	Silicon gum
UPU	Universal Programming Unit
