Call for free papers

Deadline: January 30, 1998

Send: A 200-word abstract in English to the above address.

Erratum

R.C. Read (1997) Annandale's role in the development of preperitoneal groin herniorrhapy. *Hernia* 1: 111-115

Further to a letter from Raymond C. Read and René Stoppa's comments concerning the above referenced article, we wish to inform our readers of the following:

Dr. R. Stoppa pointed out that Bates' contribution (Ref. 5) would have been better placed in the "intra-peritoneal" category, rather than the "preperitoneal".
