Jian Hua Zhu: Different behaviors of HZSM-5 zeolites synthesized in different procedures in loading of MoCl_5 and methanol to gasoline (MTG) reaction

Vol. 62, No. 1, 39-46 (1997)

The correct **Abstract** should read as follows:

MoCl_5 was loaded on the HZSM-5 samples synthesized with or without organic template. Besides differences in their surface migration and catalytic properties in MTG reaction, the Al species in the latter is found to be more stable than that of the former.
