## ERRATUM

In "Identification of the Free and Conjugated Sterol in a Non-Photosynthetic Diatom, *Nitzschia alba*, as 24-Methylene Cholesterol" [*Lipids* 13:34 (1978)] the sentence on p. 40, col. 2, l. 6-10 should read:

"The finding of 24-methylenecholesterol as the only sterol in *N. alba* is unusual since several diatoms so far examined appear to contain 22-dehydrocampesterol as principal sterol (4-7)."
