

Errata

Robert D. Campo

Effects of Cations on Cartilage Structure: Swelling of Growth Plate and Degradation of Proteoglycans Induced by Chelators of Divalent Cations

Calcified Tissue International, Volume 43, Number 2, August 1988, pages 108–121

An error appeared in Table 1, page 113, of the above article. Line 13 under the heading “Sample” in Table 1 should read: “+0.5 M EDTA, pH 7.4.”

Gitte Ørtoft and Hans Oxlund

Reduced Strength of Rat Cortical Bone after Glucocorticoid Treatment

Calcified Tissue International, Volume 43, Number 6, December 1988, pages 376–382

The authors have discovered a systematic miscomputation of the strain values in this article. In Table 3 the values of maximum deflection and the values of relative failure energy should be multiplied by 2. The values of stiffness should be multiplied by 0.5. This, however, has no effect on the conclusion of the article.
