

## Correction of a Computer-Error in the Paper

“Simultaneous Solution to Fixed Point and Minimax-Type Inequality Problems”

(Jiang Jiahe, Vol.9, No.4, 352–366)

A computer-error makes two lines(the 7-th and 8-th lines on p.360) in the paper entitled above almost blank. The two lines should be amended to read as follows:

“there is a  $\xi_y \in (x, u) \cap Z(x)$  and an  $\eta_y \in M(\xi_y)$  such that  $f(x, y, \eta_y, u) < r_1$ . In view of the basic condition (6) the function  $y \rightarrow f(x, y, \eta_y, u)$  is upper semi-continuous on the compact”
