

BIOGRAPHICAL ITEMS

Bibliographical Item

Semigroups: Proceedings of the Conference on Semigroups at Monash University in October, 1979, Academic Press, New York, 1980.

- D. B. McAlister, A random ramble through inverse semigroups.
- C. Bailey and G.R. Baird, Divisibility in categories.
- P. R. Jones, Universal aspects of completely simple semigroups.
- M. Yamada, On the structure of regular semigroups in which the maximal subgroups form a band of groups.
- P. A. Grossman and H. Lausch, Interpolation on semilattices.
- John Meakin, Constructing biordered sets.
- Takayuki Tamura, Semigroups whose congruences form a chain and which are extensions of congruence-free semigroups.
- D. C. Trueman, Direct products of cyclic semigroups.
- J. M. Howie, Gravity depth and homogeneity in full transformation semigroups.
- R. J. H. Dawlings, The semigroup of singular endomorphisms of a finite dimensional vector space.
- P. G. Trotter, Projectives in some categories of semigroups.
- T. E. Hall, Generalized inverse semigroups and amalgamation.
- G. T. Clarke, On completely regular semigroup varieties and the amalgamation property.
- C. J. Ash, Embedding theorems using amalgamation bases.
- R. McFadden, Partially ordered semigroups as semigroups.
- H. E. Scheiblich, The free elementary * orthodox semigroup.
- W. D. Munn, On the regularity of certain semigroup algebras.
- G. B. Preston, Semigroups and graphs.
- P. D. Finch, The formal structure of observational procedures.
