

**Detection of Gravitational Waves by Stellar Scintillation in Space.**

F. WINTERBERG

*University of Nevada - Reno, Nev.**(Nuovo Cimento, 53 B, 264 (1968))*

Equation (A.1) should read

$$ds^2 = \left(1 + \frac{2\varphi}{c^2}\right) c^2 dt^2 - \left(1 - \frac{2\varphi}{c^2}\right) dr^2,$$

and eq. (A.4) should read

$$n \simeq 1 - 2\varphi/c^2.$$

The following equations and the results derived from them are unchanged.
