Nonconservation of Baryons in Cosmology—Revisited

Narlikar, J. V. 1984, *J. Astrophys. Astr.*, **5**, 67–78.

The adjective ‘late’ appearing before the name of M. H. L. Pryce in the last line of p. 68 in the above paper is regretted. The author is happy to learn that Dr M. H. L. Pryce is alive and well and is at present Honorary Professor in the Department of Physics and Astronomy in the University of British Columbia, Vancouver, Canada. This note records the author’s apology to Professor Pryce.
