PACS. 03.30. – Special relativity.

1) Page 232, eq. (39b) should read as

$$\varphi' := \varphi - \frac{\partial \xi_1}{\partial t}.$$

2) Page 233: eq. (42a) should read as

$$V_{ijk} = \frac{V_i + \overline{V_j} + V_k + V_i \overline{V_j} \overline{V_k}}{1 + \overline{V_i} \overline{V_j} + \overline{V_j} \overline{V_k} + \overline{V_k} \overline{V_i}}.$$

3) Page 234: in eq. (46) should read as

$$\varepsilon'_z = \gamma(\varepsilon_z + vH_y), \quad H'_z = \gamma(H_z - vH_y).$$
