The following corrections should be made in the paper of the above title:

(1) in eq. (2.39), read ε_{ch}^2 for ε_{ch}.

(2) Read $\delta\xi_L$ for ξ_L/δ in the equation between eqs. (2.63) and (2.64).

(3) Read « $\epsilon = -\delta$, $\sin\gamma\bar{\tau} =$ » for « $\epsilon = -\delta\sin\gamma\bar{\tau} =$ » in the line just above eq. (2.69).

(4) Read ξ_L for ξ_L in eqs. (2.73), (2.74) and (2.76).

(5) Read $\varepsilon_0\tau_0$ for $\gamma\tau_0$ in the line just below eq. (2.81).

(6) In eq. (2.103) read ξ_L' for ξ_L. In the third line below this equation, read $1/\xi_L$ for $1/\xi_L'$.

(7) In eq. (3.2), a multiplication factor ξ should be included.

(8) In eq. (5.12), read $\genfrac{}{}{0pt}{}{\sin}{\cos}2(\bar{\tau} - 3\chi + \varphi_0)$ for $\genfrac{}{}{0pt}{}{\sin^2}{\cos^2}(\bar{\tau} - 3\chi + \varphi_0)$. The same correction should also be made in the line just below eq. (5.14). In the line just mentioned, read $1/\chi^2$ for $1\chi^2$.

(9) In eq. (5.17), read $\varepsilon(\bar{\tau}, \xi)/\varepsilon_0$ for $\varepsilon(\bar{\tau}, \xi)$.
