PACS 03.40 – Classical mechanics of continuous media: general mathematical aspects.

PACS 93.10 – Errata.

On page 237, first line after equation (A.10), the sentence «the field equation (A.10) has a form similar to that of the previous formulation for nonirrotational velocity fields» should read «the field equation (A.10) has a form similar to that of the previous formulation for nonirrotational and irrotational velocity fields».
