

Remarks on π^+ Photoproduction with Linearly Polarized Photons.

G. M. PAPAIOANNOU and A. VERGANELAKIS
Nuclear Research Center « Democritos » - Athens

(*Lett. Nuovo Cimento*, **3**, 559 (1970))

The following corrections should be noted:

1) eq. (5) should read:

$$\left(\frac{d\sigma}{dt}\right)_{\perp}^a = \frac{1}{16\pi} [|A_1|^2 + |t| |A_4|^2];$$

2) the sentence of page 561 line 16 should read:

... contributions to F_4 only;

3) the sentence of page 560 line 17 and page 561 line 1:

... not suppressed to the leading order in s ... should read: ... important at least up to $s \simeq 30$ GeV.
