The formula

$$F(a) = \frac{1}{\tau} \exp \left[ -\frac{t^*}{\tau} \right] \int_{-\infty}^t dx \exp \left[ -2ax^2 + \frac{x}{\tau} \right]$$

must be changed as follows:

$$F(a) = \frac{1}{\tau} \exp \left[ -\frac{t}{\tau} \right] \int_{-\infty}^t dx \exp \left[ -2ax^2 + \frac{x}{\tau} \right].$$
