Omissions are also obvious in other sections of the book. To give an example, Calcutta University offers at least thirteen medical post-graduate diplomas and degrees of which only five have been mentioned in the book. Furthermore, in many cases practitioners have been indexed under their first names instead of under their surnames (see p. 160 where at least sixteen such errors occur).

We can only hope that in the future, time and energy will not be spent in the preparation and publication of material which fails to fulfil the purpose for which it is intended. It is moreover, the reviewer's sincere wish to see an attempt made to produce the next edition of the book in as complete a form as possible.

AMALA CHAUDHURI.
