

Silicon Detectors in High-Energy Physics: Physics and Applications.

P. G. RANCOITA

CEN - Saclay, France

A. SEIDMAN

CERN - Geneva, Switzerland

(*Riv. Nuovo Cimento*, **5**, No. 7 (1982))

Three mistakes have been detected by the authors in this paper:

- 1) On p. 41, the formula on line 32 of the text should read

$$L(x, n, m) = \prod_{i=1}^j A(E_i, n) \prod_{i=j}^f A(E_i, n + m).$$

- 2) On p. 44, the formula on line 21 of the text should read

$$\sigma_x = \sigma \sqrt{1 / \sum_{i=1}^n w_i + \left[(x - \langle x \rangle)^2 / \left(\sum_{i=1}^n w_i (x_i - \langle x \rangle)^2 \right) \right]}.$$

- 3) Finally, on p. 63, on lines 8 and 11 of appendix A, both E_m should have been ε_m .
