Erratum

Cover caption, *Plant Mol Biol Repr* 18(3), 2000.

The caption for the cover figure on *Plant Molecular Biology Reporter* 18(3) was inadvertently omitted. The caption reads as follows:

Front cover: These images are from research described in this issue by Garabagi and Strommer (pp. 219-226). Fluorescent images are of leaves from four different outcross progeny of a petunia plant carrying two copies of a GFP transgene. Shown in both panels are the same leaf tips. Leaves on the left are illuminated with blue light and detected with a long-pass emission filter. Red chlorophyll autofluorescence mixes with green fluorescence to give outcross leaf colors ranging from red to yellow. On the right, detection is with a green-specific filter, revealing only GFP fluorescence.
