'Quantum chromodynamics corrections to polarised deep-inelastic electron-nucleon scattering' by V Gupta, S M Paranjape and H S Mani, *Pramana*, **14**, pp. 119—135, 1980.

(i) Replace p by P in Eq. (4c) and Eq. (29).

(ii) Replace X^H by X_H in line 15, p. 122 and Eq. (49).

(iii) The definition in line after Eq. (28) should read $p_{qq}^{(n)} = \int\limits_0^1 dz\; z^{n-1}\, P_{qq}^{(z)}$.

(iv) Replace the $\times$ sign after $\dfrac{3}{2\epsilon}\, \delta\,(1-z)$ by the $+$ sign in Eq. (30).

(v) In line 18, p. 130 read $V_R = \dfrac{1}{2z}\, A_R + B_R$.

(vi) Eq. (49), p. 133.. Replace $G_1^{N(n)}$ by G_1^N and d^2 by $d^2\sigma$ under the integral signs.

(vii) Line 17, p. 134, for connections read corrections.
