W. Schweitzer, Passau

Erratum:

A. A. Alzaid: Mean residual life ordering. *Statistical Papers* 29 (1988), 35 - 43.

There are two misprints on page 38.

1. Theorem 2.3 should read " $X \underset{H}{\geq} Y$ " implies " $X \underset{\overline{m}_r}{\leq} Y$ ". The proof of the Theorem is valid with this correction.
2. " $X \underset{H}{\geq} Y$ " should read " $X \underset{H}{\leq} Y$ " on the implication at the bottom of p. 38.

I am grateful to Professor D.N. Shanbhag from Sheffield University for pointing this out.
