69-89.

Patrizia Berti has kindly pointed out to me a gap in the proof of Theorem 7 (pp. 84-85). In fact,  $T_2$ -measurability of  $f$  w.r.t.  $(\Omega, \mathcal{F})$  need not follow from  $T_2$ -measurability of  $f$  w.r.t.  $(\Omega, \mathcal{H})$ . Hence, the first period of the proof is incorrect. The problem can be overcome by assuming that  $f$  is  $T_2$ -measurable w.r.t.  $(\Omega, \mathcal{F})$ .
