Those interested to participate and present their work may send summary of their paper to: Dr. P. L. Dhingra, Associate Professor Deptt. of ENT,

Book Review

A short text book of E.N.T. by Dr. Santanu Banerjee, published by Modern Book Agency Private Ltd., Calcutta, 200 pages, Illustrated, with index. Price Rs. 40.00.

The book is indeed handy, the typeset is easily readable, the layout is pleasing and the subject is covered adequately for the undergraduate student. The brief historical review is interesting but rather didactic and would perhaps have been more interesting if incorporated in the relevant portion of the text allowing easy comprehension of the eponyms. The line drawings are clear and well reproduced. The photographs are in general poorly reproduced. The photographs, as far as possible, should be replaced by line diagrams. Proof reading should improve. The overall impression is that this is a very useful book for the undergraduate student.

S. D. Mukhopadhyay

Logan Turner's Diseases of the Nose, Throat & Ear—Edited by J. F. Birrell, 9th Edition 1982 (U.K. £ 9.50, Indian Ed. £ 135.00, Agent in India—K. M. Varghese Cr. Medical Booksellers & Publishers 104-105, Hind Rajasthan Building, Dadar, Bombay-400 014.

The revised 9th edition of the book contains many important chapters and will be very useful for trainees in E.N.T. and diploma students. Lot of useful additions and alterations have been made to make the book more comprehensive. Line drawing, replacing the old illustrations, have enhanced the usefulness of the book. Chapters on audiology and vestibulometry, cosmetic facial surgery, transphenoidal hypophysectomy, neck space infection, neck masses etc. will be useful for junior post graduate students.
