Errata

In Volume 10, No. 1 an error has occurred in the placement of Figures 2 and 4 in the article *Sensory Nature of Reward* by Wanda Wyrwicka. The illustration listed as Figure 2 on Page 35 is actually Figure 4; Figure 4 on Page 40 is actually Figure 2. The legends are correct as placed.

An error also occurred in the text on Page 32, line 7-8 from the bottom. The mistaken text: “; thus, the instrumental act is rewarded each time. There-warded; as a result, it gradually disappeared” should be replaced by the following correct text: “Therefore, the instrumental response was no longer rewarded; as a result, it gradually disappeared.”
