

Clinical and Academic Anaesthetists Required

The Department of Anaesthesia invites applications for positions at the London Health Sciences Centre and St. Joseph's Health Centre, London, Ontario.

We are seeking individuals with appropriate skills in a wide variety of areas including neuro, cardiac, vascular, thoracic, transplantation, paediatric and obstetric anaesthesia, as well as critical care, pain management, pharmacology, informatics, clinical trials or education.

London Health Sciences Centre is a 990 bed tertiary care centre created by the merger of University and Victoria Hospitals and is the main teaching hospital for the University of Western Ontario. St. Joseph's Health Centre is affiliated with the University of Western Ontario and is the tertiary obstetric centre. The Departments have a very busy clinical service as well as active research and teaching programs.

Academic rank and competitive contractual arrangements will be commensurate with experience and qualifications. Candidates must be FRCPC certified or equivalent and be eligible for licensure in Ontario. In accordance with Canadian Immigration requirements, this advertisement is directed to Canadian citizens and Permanent Residents of Canada. The University of Western Ontario is committed to employment equity, welcomes diversity in the workplace and encourages applications from all qualified individuals including women, members of visible minorities, aboriginal persons and persons with disabilities. Positions are subject to budget approval.

Please send applications with curriculum vitae and the names of three referees to:

**Dr Adrian W. Gelb, Professor and Chair, Department of Anaesthesia, London Health Sciences Centre,
339 Windermere Rd, London, Ontario, Canada N6A 5A5

McGILL UNIVERSITY HEALTH CENTRE

Clinical Fellowships

Canadian and American graduates are invited to submit applications for fellowship positions starting July 1, 1998. Fellowships are available in cardiac, thoracic, pediatric, obstetric, neurological anaesthesia, trauma and acute and chronic pain management. Research projects usually of a collaborative nature can be arranged and protected time is available to pursue scholarly activities. Main research areas are on depth of anaesthesia, electrophysiology, pharmacokinetics, metabolism, respiratory, pain and thermal balance.

Interested international graduates require the FMGEMS or the Evaluating Examination of the Medical Council of Canada.

Please send applications with curriculum vitae and the names of three referees to:

Montreal is an attractive, accessible, cosmopolitan and bilingual city. McGill University is one of the oldest in North America and is renowned for academic achievement. Montreal is a friendly place to live and McGill is a great learning institution with an international reputation.

HAMILTON HEALTH SCIENCES CORPORATION Full-Time Staff Opportunity

The Department of Anaesthesia, Hamilton Health Sciences Corporation, has an opening for a full-time staff member. The Department is one of two clinical departments which make up the McMaster University Department of Anaesthesia, and appointees will be expected to participate actively in the academic activities of the department.

The corporation activities include a very broad range of secondary and tertiary care clinical opportunities from neonatal to geriatric, and all surgical services with the exception of pediatric open heart.

There are three campuses, with nearly 30,000 surgeries annually equally divided amongst them. At McMaster campus pediatric surgery is sited, including neonatal. There are also programs in total joint replacement, major general surgery (affiliated with the Digestive Diseases Programs), gynaecology and high risk obstetrics. Hamilton General site includes programs in adult cardiac surgery, adult neurosurgery, vascular surgery and is the Regional trauma centre. The Henderson General site is located adjacent to the Regional Cancer Centre, and includes gynaecologic oncology, total joint reconstruction, general surgery and general orthopaedics.

Outpatient chronic pain management is mostly sited at McMaster, and acute pain management opportunities are distributed throughout the corporation. Research interests presently active in the Corporation encompass acute and chronic pain management (including alternative modalities such as acupuncture), prediction and treatment of peri-operative nausea and vomiting, prediction and prevention of peri-operative cardiac ischemia, the study of heparin induced thrombocytopenia and an expanding field of research in vascular derived mediators in anaesthesia and surgery.

Please reply with a CV and the names of 3 references.

McGILL UNIVERSITY HEALTH CENTRE

Faculty Recruitment

The Department of Anesthesia invites applications for positions at the McGill University Health Centre.

The Montreal Children's, the Montreal General, the Montreal Neurological and the Royal Victoria Hospitals, as well as the Faculty of Medicine of McGill University have officially formed the McGill University Health Centre as a means of enhancing medical education, strengthening medical research and providing the public with top quality health care. In addition, openings are available at the Sir Mortimer B. Davis - Jewish General Hospital which is affiliated with McGill.

We seek individuals with appropriate skills in a wide variety of areas including neuro, cardiac, vascular, thoracic, transplantation, obstetric and paediatric anaesthesia, as well as critical care, pain management, pharmacology, informatics, clinical trials or education.

The Department of Anesthesia at McGill is proud of its achievements in the areas of clinical care, teaching and research. It has an excellent reputation as a centre of high educational standards and many of the graduates from our residency program are leading clinicians and academics not only in North America but around the world.

McGill University is committed to equity in employment.
