ERRATA

“The Significance of the Phonetics of speech to the Otolaryngologists” in “Conference Number” of March 1962.

1. Figure on **Page 2** is Fig. No. 4.—“Picture test used in tests of hearing. The words across have similar vowels, for example Van, man, Lambs, pan etc. If hearing is deficient for consonants, the child can not distinguish between words as he will hear only the vowel sound in each case”.

2. Figure 2, page 4. delete “lips” from the label “Lips places of Articulation”.

3. Figure on page 12 is Fig. No. 1 and **not** figure No. 4. It should be labelled “Lip position of Hindi Vowel अ”.

4. Page 13. Last but one paragraph. line 13, put fullstop after “to make their linguistic development possible”.
