Errata

Vol. 40, No. 3, 1990: Some inconsistencies in the literature regarding ketotifen plasma concentrations have been incorporated into our review and the following corrections are required:

- Page 414:** The units for C_{\max} and AUC quoted in lines 5 to 7 of the Pharmacokinetic Properties section should read $\mu\text{g}/\text{L}$, $\mu\text{g}/\text{L} \cdot \text{h}$ rather than mg/L and $\text{mg}/\text{L} \cdot \text{h}$, respectively.
- Page 423/424:** Since the concentration of 1 mg/L is supratherapeutic, the comment included in parentheses in the final sentence ('i.e. an achievable plasma concentration') on page 423 is no longer applicable and should be deleted.
- Page 427:** The values 1.92 mg/L and 16.98 mg/L in lines 5 and 6 of the right hand column should read 1.92 $\mu\text{g}/\text{L}$ and 16.98 $\mu\text{g}/\text{L}$, respectively.
- Page 428:** The units mg/L and $\text{mg}/\text{L} \cdot \text{h}$ in lines 9 and 12 of the left hand column should read $\mu\text{g}/\text{L}$ and $\mu\text{g}/\text{L} \cdot \text{h}$, respectively.
- Page 429:** The plasma concentration units of mg/L in fig. 6 should read $\mu\text{g}/\text{L}$.

Vol. 40, Suppl. 3, 1990: In the Round-Table Discussion on page 131, Dr R.K. Chawla's response to a question about the effect of SAMe on symptoms of schizophrenia included observations by Fazio et al. (1973). This study involved 49 depressed inpatients and 3 schizophrenics, not 49 schizophrenic patients as stated. The study reported 'positive results in over 80% of cases of depressed patients and changes in psychomotor hyperactivity in the schizophrenics'.

Vol. 41, No. 1, 1991: The first sentence of the Synopsis should read 'Bopindolol is a nonselective β -adrenoceptor antagonist with partial agonist activity . . .'
