Preface

Let us welcome our new editor: Professor Abul Hasan Siddiqi, Department of Mathematical Sciences, King Fahd University of Petroleum and Minerals, Dhahran, Saudi Arabia.

A number of our members of the editorial board have volunteered to invite experts to write quality expository articles in a number of topics in sampling theory and its applications. Our first volunteer is our editor Professor Bernard Lacaze who is writing on “Theoretical Approach to Stationary Processes Sampling.” Our second volunteer is also our editor Professor Hidemitsu Ogawa writing on “Someya’s contribution to sampling theory.”

Last, I may remind our readers (again) that institutional and personal subscriptions to our journal constitute its main source of support. However, they are still not coming close to sufficiently supporting the journal.

I should also bring to the attention of our authors again that we have changed the size of the text to 5.25” X 8.00”.
