1. Eq. (3.11) should read as

$$\cos(\beta_M - \alpha_M) = \frac{|(m_\nu)_{11}|^2 - c_{12}^4 m_1^2 - s_{12}^4 m_2^2}{2 c_{12}^2 s_{12}^2 m_1 m_2}. \tag{3.11}$$

(In RHS of the Numerator m_1^4 is replaced by m_1^2).

2. In eq. (3.15) the term D should read as

$$D = m_1 m_2 \left[2 Z c_{12}^2 s_{12}^2 + Z \sin 2\theta_{12} \cos 2\theta_{12} s_{13} e^{i\delta} \frac{t_{23}^2 - 1}{t_{23}} - 2 s_{12}^2 c_{12}^2 \right]$$

(In the second term of the RHS a missing factor 'Z' is inserted).
