

Correction

In the first supplement issue (March 1997) of *Inflammation Research*, we published the article 'Platelet aggregation and platelet histamine release by immunological stimulation in atopic patients: Modulation by nitric oxide' by E. Masini et al. (Inflamm res 46; Suppl 1:S81–2). Since its publication, we have been notified of an error in the caption of Figure 1 on page S82 of this article.

The legend should read:

Platelet aggregation and histamine release induced by anti-IgE in human platelets from 4 atopic donors before and after IS-5-MN therapy.
