The success of a journal depends greatly on the publication of high quality papers. This can only be achieved with fair, rigorous and constructive reviews provided by peers in the same field in a timely manner.

The International Journal of Advanced Manufacturing Technology (IJAMT) has established itself with the sterling support of peer reviewers throughout the years.

To express the deep appreciation of our reviewers, we would like to dedicate a page highlighting individuals who have made such contributions. The editors are indebted to their unfailing support and acknowledge their great effort for another successful year for the journal.

Their names are listed in alphabetical order in the following list, covering a period from 1 January 2021 to December 2021.
