Correction to: International Urogynecology Journal

<https://doi.org/10.1007/s00192-017-3407-3>

The last paragraph of the “Interpretation” section contains an error. In the second sentence of the said paragraph, the word “all” was changed to “any of the”, which gave a completely different meaning to the content. The correct sentence is shown below:

However, testing for associations with the individual POP-Q variables did not reveal an anatomical feature to be associated with a vaginal bulge at all five visits.

The original article has been corrected.

The online version of the original article can be found at <https://doi.org/10.1007/s00192-017-3407-3>
