The article “Analytical determination of the end-winding portion of the winding-to-rotor capacitance for the prediction of bearing voltage in electrical machines”, written by Jan Ole Stockbrügger and Bernd Ponick, was originally published Online First without Open Access. After publication in volume 102, issue 4, page 2481–2491 the author decided to opt for Open Choice and to make the article an Open Access publication. Therefore, the copyright of the article has been changed to © The Author(s) 2021, and the article is forthwith distributed under the terms of the Creative Commons Attribution 4.0 International License, which permits use, sharing, adaptation, distribution and reproduction in any medium or format, as long as you give appropriate credit to the original author(s) and the source, provide a link to the Creative Commons licence, and indicate if changes were made.
