Correction to: Archives of Toxicology
<https://doi.org/10.1007/s00204-020-02792-5>

In the original publication of the article, Table 3 has been published with an error. The red mark-ups were not changed to black color.

The correct Table 3 is given in this correction.

The original article has been updated.

The original article can be found online at <https://doi.org/10.1007/s00204-020-02792-5>.

Significance levels were calculated comparing treatment responses to assay's specific control using one way ANOVA followed by a Dunnett's test, $*p < 0.05$. Light grey = chemical not tested in particular assay, dark grey = not enough replicates to perform statistics. The numbers correspond to the used concentrations in μM : $a = 0.000128$, $b = 0.0064$, $c = 0.0032$, $d = 0.016$, $e = 0.08$, $f = 0.4$, $g = 7$ and $h = 10$
