Erratum: Zheng, T., Zheng, C., Gao, F. et al. Dexmedetomidine suppresses bupivacaine-induced parthanatos in human SH-SY5Y cells via the miR-7-5p/PARP1 axis-mediated ROS. Naunyn-Schmiedeberg's Arch Pharmacol (2020). <https://doi.org/10.1007/s00210-020-01971-6>

The authors regret that following the publication of original article [1], the authors recently found that Fig.3A images were obtained from our other group and were dragged in by mistakes. This mistake happened in the process of image saving. After performing measurement of intracellular ROS, they inadvertently put all images into the same folder and pasted wrong images into the Fig. 3A. Thus, for the validity and rigorousness of research results, we would like to apply for the correction of the pictures in Fig. 3A. These errors were caused by our carelessness and misoperation in image processing. We assure that the correction of these will not alter

the conclusion of the results. We sincerely apologize to the editor, reviewers and readers for any inconvenience that caused by these unintentional mistakes. The revised Fig. 3 is shown below.

The authors would like to apologize for any inconvenience caused.
