The Editor-in-Chief has retracted this article because of significant concerns regarding a number of the figures, specifically the Western blots presented in Figures 4B and 5A, and the confocal microscopy analysis presented in Figure 3B. The authors did not respond to the request for raw data and the Editor was also unable to contact authors' institution. The Editor-in-Chief therefore no longer has confidence in the integrity of the data in this article.

None of the authors responded to the correspondence from the Editor or Publisher about this retraction.
