Correction to: Psychopharmacology

<https://doi.org/10.1007/s00213-020-05593-x>

The title of this article is “mRNA and microRNA profiles are associated with stress susceptibility and resilience induced by psychological stress in the prefrontal cortex”. However, the title was mistakenly summed as “Revision to psychopharmacology mRNA and microRNA profiles are associated with stress susceptibility and resilience induced by psychological stress in the prefrontal cortex “(as seeing in <https://doi.org/10.1007/s00213-020-05593-x>) at the proof stage. The words “Revision to Psychopharmacology” was just a revision mark, not part of the article’s title.

We are very sorry that we did not find this mistake in the proof process.

Publisher’s note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
