The original version of this print publication unfortunately contains an error in the alpha value under “Data analysis” section (i.e., p. 139, right-hand side, 1st paragraph, 3rd line). It is now corrected as given in the sentence below:

“Then, instead of using the likelihood test, we tested the adequacy of our data compared to the theoretical distribution with a  $\chi^2$ -goodness-of-fit test ( $\alpha = 0.05$ ).”
