Preface

**Sergei Artemov · Volker Diekert ·
Alexander Razborov**

This volume is devoted to selected papers from the 3rd International Symposium on Computer Science in Russia (CSR 2008), held June 7–12 in Moscow, Russia.

CSR 2008 was the third in a regular series of international meetings that commenced with CSR 2006 in St. Petersburg. The scope of the symposium was quite broad, covering many areas of computer science and its applications.

The symposium itself was comprised of two tracks: Theory and Applications/ Technology. This volume contains papers from the Theory Track (Program Committee Chair Alexander Razborov), selected by the editorial board, which was appointed by the Program Committee. These papers have all been refereed according to usual ToCS standards.

We wish to thank again all institutions involved in the organizing of the Symposium, and our sponsors for their support. In particular, we extend our gratitude to Alexei Semenov and Yuri Pritykin for their outstanding help with local organizational issues.
