The meeting will be held at the Saint Petersburg State Forestry Technical Academy (SPb FTA) and Moscow State Forestry University (MSFU) with support from the Regional Coordinating Council of Wood science, the Main Botanical Garden of the Russian Academy of Science and the EFI Project Center in SPb PROCES.

Papers and posters are invited on the following themes:

1. Wood structure at the nano, micro, meso and macro scales.
2. Properties of wood as an industrial raw material.
3. Modern methods, techniques and equipment for the processing of wood.
4. Industrial control of wood and wood products.
5. Innovative and smart wood products.
6. Sustainable use of forest resources.
7. Multiple forest values and their estimation.
8. Forests in the changing world.
9. International aspects of forest resources utilization.
10. Forest resources and global wood products markets and trade.
11. Wood formation, wood plant physiology and dendrochronology.
12. Biomechanics.

In addition to the scientific programme a cultural programme will be available for accompanying persons.
